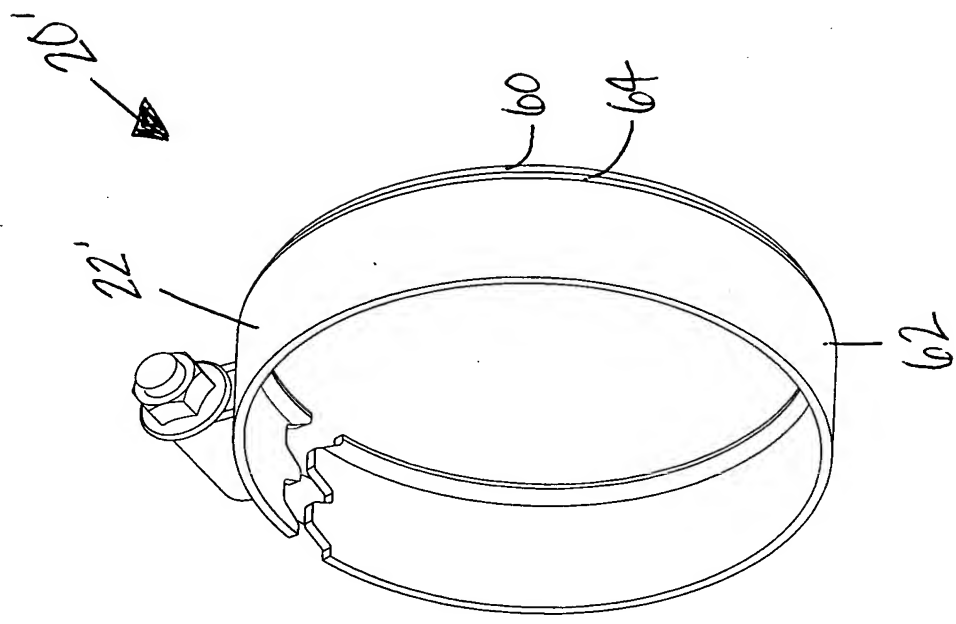

FIG. 8

FIG. 8 is a perspective view of a ring-shaped device, likely a clamp or band. The device consists of a main ring body with a central opening. A clamping mechanism is attached to the outer edge of the ring. This mechanism includes a bolt (60) and a nut (62) that are used to tighten the device. A bracket (64) is also shown, which is part of the clamping assembly. A dashed arrow (20') points towards the device, indicating a direction of view or assembly.

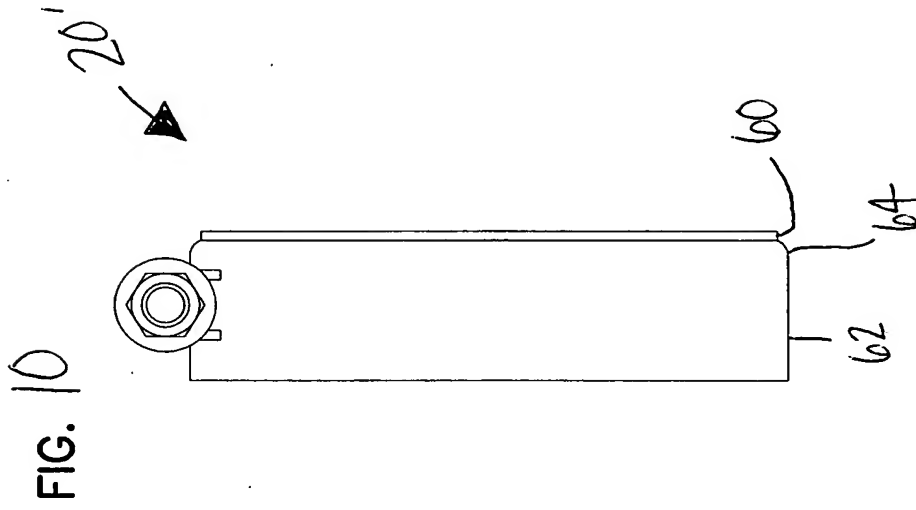

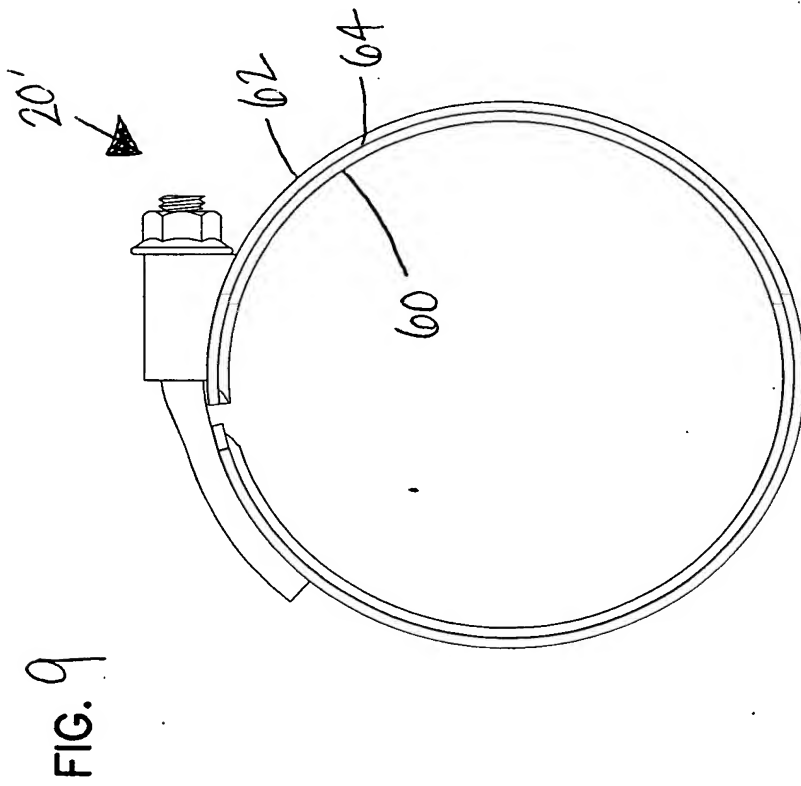

FIG. 9
